

29th April 2021

To whom it may concern,

Certificate of conformance

This document is hereby issued to clarify the shelf life of DPL Line Pro Electrical Gloves class 00, class 0, class 1, class 2, class 3 and class 4 under recommended storage conditions.

As per IEC 60903:2014 standard, any Electrical Gloves has a shelf life of one year from date of manufacture that is indicated on the gloves. The concerned extract from the standard is as mentioned below.

According to IEC 60903:2014 under Annex A.6 "Periodic inspection and electrical re-testing"

- No gloves should be issued to service unless it has been retested in the previous twelve months.
- No gloves to be used unless they have been tested within a maximum period of six months after issued for service.
- The date of manufacture is the original test date.

The gloves can be issued to service before completing twelve months from the date of manufacture without testing and once issued for service, gloves will need to be retested every six months thereafter.

If the gloves have not been used within one year from the date of manufacture, the user can still use it after conducting a dielectric test and assuring that the gloves still provide adequate protection according to the standard.

The above information will be valid until any amendments come into effect to the existing standard.

For Dipped Products PLC,

.....
Dr. Upul Ratnayake

Head of Technical and R&D
